

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: Data Structures, Advanced Java, System Design, Machine Learning, Big Data

Experience

- Amazon

Software Development Engineer Intern

May 2025 – Aug 2025

Seattle, US

– Designed and implemented backend **REST APIs** in **Java** and **React** web UI components for an internal operations console; delivered scoped features with mentor guidance through the full development lifecycle.

– Created **unit and integration tests** with **Mockito**; participated in peer **code reviews**, debugged service defects, and incorporated feedback to improve maintainability before cloud release.

– Supported **Agile** delivery on an event-driven platform (**ECS Fargate**, **SQS**, **SNS**) with **AWS CDK** and **multi-stage CI/CD** across regions.
- New York University (Novel AI Technologies, Inc.)

Software Developer

Aug 2024 – Present

New York, US

– Built an analytics **web application** (**React**, **TypeScript**, **JavaScript**, **Node.js**, **REST APIs**) supporting institutional client workflows; implemented UI components and backend endpoints deployed on **Docker/AWS EC2**.

– Authored **SQL** ETL jobs into **PostgreSQL** processing **250K+** records; troubleshooted application errors and partnered with product stakeholders on estimates, status, and rollout support.
- CampusMesh

Software Engineer

Jan 2026 – Present

New York, US

– Developed **JavaScript/TypeScript** services and **REST APIs** backed by **MySQL**; shipped fixes and enhancements through **Git**-based workflows across **4 cloud environments** with documented handoffs.

– Deployed containerized services with **Docker** and **Kubernetes**-style release patterns on **AWS**; raised risks early in standups and participated in refinement discussions.
- PricewaterhouseCoopers (PwC)

Senior Software Engineer

Aug 2021 – Aug 2024

Bengaluru, India

– Developed production services in **Java** and **JavaScript/TypeScript** on **Microsoft Azure**; wrote **SQL** queries over **SQL Server** and contributed to **Agile** ceremonies, code reviews, and **Azure DevOps CI/CD** releases.

Projects

- Advanced Expense Tracker (Java Application) | Java, JDBC, SQL, JUnit, Data Structures, Algorithms, OOP

– Architected a modular **Java** application applying **data structures**, **algorithms**, and **OOP**; wrote **JUnit** tests for core business logic and **SQL** persistence via **JDBC**.
- Hospital Management System (Full-Stack Web Application) | React, TypeScript, JavaScript, Node.js, REST APIs, SQL

– Built **React** UI components and backend **REST APIs** with **role-based access control**; wrote **API unit tests** and documented modules for collaborative team delivery.

Skills

- **Programming Languages:** Java, JavaScript (ES6), TypeScript, Python, SQL, C++
- **Web & Backend:** React, REST APIs, Node.js, Microservices, Data Structures, Algorithms
- **Databases:** PostgreSQL, MySQL, SQL Server, DynamoDB, MongoDB
- **Cloud & DevOps:** AWS (CDK, ECS, Lambda, SQS, SNS), Docker, Kubernetes, CI/CD, Git
- **Messaging & Tools:** Kafka, Mockito, JUnit, Postman, Visual Studio, Agile Development Methodology

Certifications

AWS Cloud Practitioner

Azure Data Fundamentals

Stanford Machine Learning (Coursera)
