Hiring Manager

Texas Windstorm Insurance Association (TWIA)

Texas

Dear Hiring Manager,

I'm Ajay Venkatesh, completing an M.S. in Computer Engineering at NYU, with production software experience at PwC in Bengaluru, a summer SDE internship at Amazon, and ongoing on-campus work at NYU's Novel AI Technologies. I'm applying for the Software Developer I role, where I'd help design, build, test, and support modern insurance applications across the full development lifecycle.

At PwC, I developed and maintained applications on **Microsoft Azure** using **C#/.NET**, integrating with **Dynamics 365 CRM** through **REST APIs** over **SQL Server**. I wrote **SQL queries and stored procedures**, documented solution designs, troubleshooted production defects, and shipped changes through **Azure DevOps CI/CD** in a regulated environment with both technical and business stakeholders.

At NYU, I built an **insurance analytics platform** and broker portal in **React** and **JavaScript** for P&C-style underwriting workflows, with external insurer integrations, **PostgreSQL** reporting jobs, and UI changes driven by business feedback. At Amazon, I implemented **RESTful Java APIs** with **JUnit/Mockito** tests, participated in code reviews, and supported releases through **Git-driven CI/CD**.

My stack includes **Java**, **C#**, **.NET**, **JavaScript**, **React**, **SQL**, **RESTful APIs**, **Azure**, **AWS**, **Docker**, **Git**, and **Visual Studio**. **Guidewire**, **GOSU**, **SOAP**, and **Subversion** are areas I have not used in production yet, but my insurance platform work, **.NET/Java** development background, and full-lifecycle delivery experience give me a strong foundation to ramp quickly on TWIA's stack.

What draws me to TWIA is the chance to build software that supports property and casualty insurance for Texas communities facing windstorm risk. I care about clear documentation, dependable releases, and partnering with engineers and business users to deliver maintainable applications.

I'd welcome the chance to discuss further. Thanks for considering my application.

Sincerely,

Ajay Venkatesh
