

Education

New York University, New York, NY

Aug 2024 – May 2026

Master of Science in Computer Engineering (GPA: 3.9/4.0)

Coursework: System Design, Cloud Computing, Machine Learning, Big Data, Advanced Java, Data Structures

Visvesvaraya Technological University

Jun 2017 – Aug 2021

Bachelor of Engineering in Electronics and Communication (GPA: 8.9/10)

Experience

• CampusMesh

Jan 2026 – May 2026

Software Engineering Intern

New York, US

- Developed scalable **Node.js microservices** powering real-time academic workflows across study groups, messaging, calls, notifications, and profile management, backed by **MySQL (Sequelize)** and **DynamoDB**.
- Deployed **serverless architecture** on AWS using **Serverless Framework** with **Lambda, API Gateway, S3, and CloudFront** across **4 environments** (local, dev, staging, production); enforced security with **KMS-managed keys, SSM Parameter Store**, and **least-privilege IAM**.
- Worked on **LLM-based retrieval pipelines (RAG)** for CampusIQ (AI Assistant), leveraging **embedding-based semantic search** and structured data indexing to improve contextual accuracy by **30%**.

• Amazon

May 2025 – Aug 2025

Software Development Engineer Intern

Seattle, US

- Designed a secure UI Console architecture using **Midway SSO, OAuth, and HELIS** to enforce least-privilege **role-based access (4+ roles)**; presented the solution to the team and received design approval.
- Provisioned **serverless Infrastructure-as-Code** using **AWS CDK** with API Gateway, Lambda, DynamoDB, S3, and IAM; built a **multi-stage, multi-region CI/CD pipeline** with automated promotion and rollback controls.
- Built a **React 18** frontend with optimized API integration, advanced filtering, and client-side caching, reducing page load time by **40%**.
- Engineered backend services in **Java** (Coral, Smithy, Dagger DI, CBOR); applied **low-level design patterns**, cutting backend execution time by **35%** with unit/integration testing via **Mockito**.

• New York University (Novel AI Technologies, Inc.)

Aug 2024 – Present

Software Developer

New York, US

- Architected an **NSF-funded (\$100K)** AI-powered health app for **iOS** and **Android** processing real-time wearable data; deployed cloud-hosted AI models for health metric analysis and food image processing.
- Engineered **ETL pipelines** transforming **NoSQL** into **PostgreSQL** with **concurrency control and locking**; processed **250K+** records and powered **AWS QuickSight** dashboards.
- Developed an insurance analytics platform (**React, Node.js, REST APIs**) deployed via **Docker** on **EC2** with **document/media processing** and **WebSocket-based real-time communication**; implemented Stripe billing, RBAC, and row-level security, generating **\$50K+** revenue across **6 clients**.

• PricewaterhouseCoopers (PwC)

Aug 2021 – Aug 2024

Senior Software Engineer

Bengaluru, India

- Designed and shipped client-facing features on **Microsoft Dynamics 365** using **C#/.NET** plugins, workflows, and webhooks, with internal services exposed via **REST APIs** validated end-to-end with **Postman**; cut query execution time by **35%**.
- Authored **technical design (HOW) documents** and broke features into ADO **Boards** epics, features, and stories under **Agile/Scrum**; deployed through **Azure DevOps Pipelines** (Boards / Repos / Pipelines) per sprint and milestone commitments.
- Instrumented services with **Application Insights** telemetry and built **5 Power BI dashboards** monitoring live system health, error rates, and regressions across multiple databases, accelerating incident detection and improving reporting efficiency by **40%**.
- Wrote **unit and integration tests** for every check-in, led structured **code reviews**, and participated in incident response with root-cause analysis and post-incident documentation; mentored junior engineers on **software design principles**, reducing production defects by **25%**.

Projects

• InviLite | AWS, SageMaker, Bedrock, FAISS, Python

- Architected a cloud-native data pipeline (Kinesis, Lambda, S3, Glue, DynamoDB) ingesting structured and unstructured enterprise data into governed ML pipelines.
- Built a **RAG system** (SVM + FAISS + **Bedrock LLM**), cutting incident resolution from **1–2 hours to minutes** and lifting root-cause classification accuracy from **56% to 92%**.

Skills

- **Programming Languages:** C#, Python, Java, C++, JavaScript, TypeScript, SQL
- **Cloud (Azure):** Azure AI Services, Azure AI Foundry, Cognitive Services, Logic Apps, Function Apps, Storage Blobs, Data Lakes, Azure DevOps
- **Cloud (AWS):** CDK, SDK, EC2, S3, Lambda, IAM, SageMaker, Bedrock, API Gateway, DynamoDB
- **Databases:** SQL Server, Dataverse, PostgreSQL, MySQL, MongoDB, DynamoDB
- **Microsoft Stack:** .NET, Power Platform, Power Automate, Power BI, Microsoft Copilot Studio, Microsoft Dynamics CRM
- **DevOps & Tools:** Docker, Kubernetes, CI/CD Pipelines, PowerShell, Git, Visual Studio, Postman
- **AI/ML:** RAG, MLOps, AI Solution Deployment, Responsible AI, Model Validation & Monitoring

Certifications

[AWS Certified Cloud Practitioner](#) | [Azure Data Fundamentals](#) | [Azure Data Scientist Associate](#) | [Power BI Data Analyst Associate](#)
